

Vis-CUS

AI solution for Echocardiography myocardial function evaluation

It secures diagnostic insight through visualization based on AI data analysis and improves the workflow for assessing myocardial function, **contributing to improving medical services and patient quality of life.**

VisCUS
Key stroke
**50%
Reduction**

Simplifies user keystroke measurement of cardiac function through AI analysis

Analyze the risk of myocardial infarction by providing the degree of ischemia of the heart muscle

Quantification of cardiac function [Ejection Fraction, Strain and Cardiac movement]
